Ongoing collaborations

AFIPS: The African Initiative for Planetary Science, 2017-2024

It promotes planetary science in Africa by linking it with geosciences, focusing on Earth's early history, habitability, and its evolution influenced by solar and impact processes. **David**

Baratoux

Consejo Superior de Investigaciones Científicas - CSIC i-COOP Scientific Cooperation for Development Programme aims to foster collaboration between CSIC research groups and international partners (including **Ivory Coast**, **Burkina Faso**, South Africa, and **Madagascar**) by supporting training opportunities, research work, and specialized exchange visits.

The Festival of Astronomy of
Madagascar - **David Baratoux**
